INDEX to CONTENTS

TO VOLUME 59

August 10th, 1936 to August 2nd, 1937

TO expedite the finding of a particular article, a few words of explanation are necessary.

The Markets are not indexed because they refer to current market activity. To know the condition of the market at a certain time, it is only necessary to refer back to THE CANNING TRADE of that date.

"Crop Reports" and "Grams of Interest" are not indexed for much the same reason, as can be readily understood.

Many bind volumes of THE CANNING TRADE, others file each issue so that when reference to certain important subjects is desired, consulting the index in the last number of the volume will save a lot of unnecessary thumbing. The index for Volume 59, issues dated August, 1936, to August, 1937, follows:
